Summary

Principal Engineer / Tech Lead / Team Lead / Senior Software Engineer with 10 years of experience in software (python, node.js, react, linux/docker). As a CTO, I built a team from scratch and implemented CI/CD, Code Review, and Agile processes. Expert in designing the structure and increasing team productivity. Looking for an opportunity to make a strategic contribution to the development of technology products.

Experience

Company name under NDA
CTO   2023 – 2024
- grew tech department from zero to modern agile team
- hired a team - 3 backend dev, 1 frontend dev, 1 QA
- implemented VCS, CI/CD, code review practices
- implemented and advocated task/project management system
- participated as tech lead / admin / ops in early stages: buying / owning dedicated servers, implementing monitoring and backups, building production environment for the apps
- planning further development of company products from technical perspective

Fueled
Software Engineer   2023
- implemented etl modules for aws-lambda pipelines
